## LCLT dryer

### OPTIMIZED DRYING for exceptional results

Thanks to its intelligent technology and constant low-temperature climate conditions, the **LCLT** offers the perfect balance between quality, energy management, and drying speed. It allows for mixing different species and thicknesses. The drying of silver fir is optimal. This ensures perfectly dried wood, ready to be used without delay.

### EFFICIENT MANAGEMENT for simplified inventory and handling

Eliminates outdoor storage of green timber and its inherent defects. Eliminates the need for dry timber sheds.

## The real Swiss army knife of softwood drying

### A SOLUTION DESIGNED TO MEET THE NEEDS of all professionals

The **LCLT** offers the flexibility to meet the needs of both large industrial clients and small traders or craftsmen.

### Choose the CATHILD LCLT dryer

A must-have solution when mechanical stability is essential. It's the benchmark for engineered wood products, glulam, cross-laminated timber (CLT), finger-jointed timber, structural timber and framing applications...
