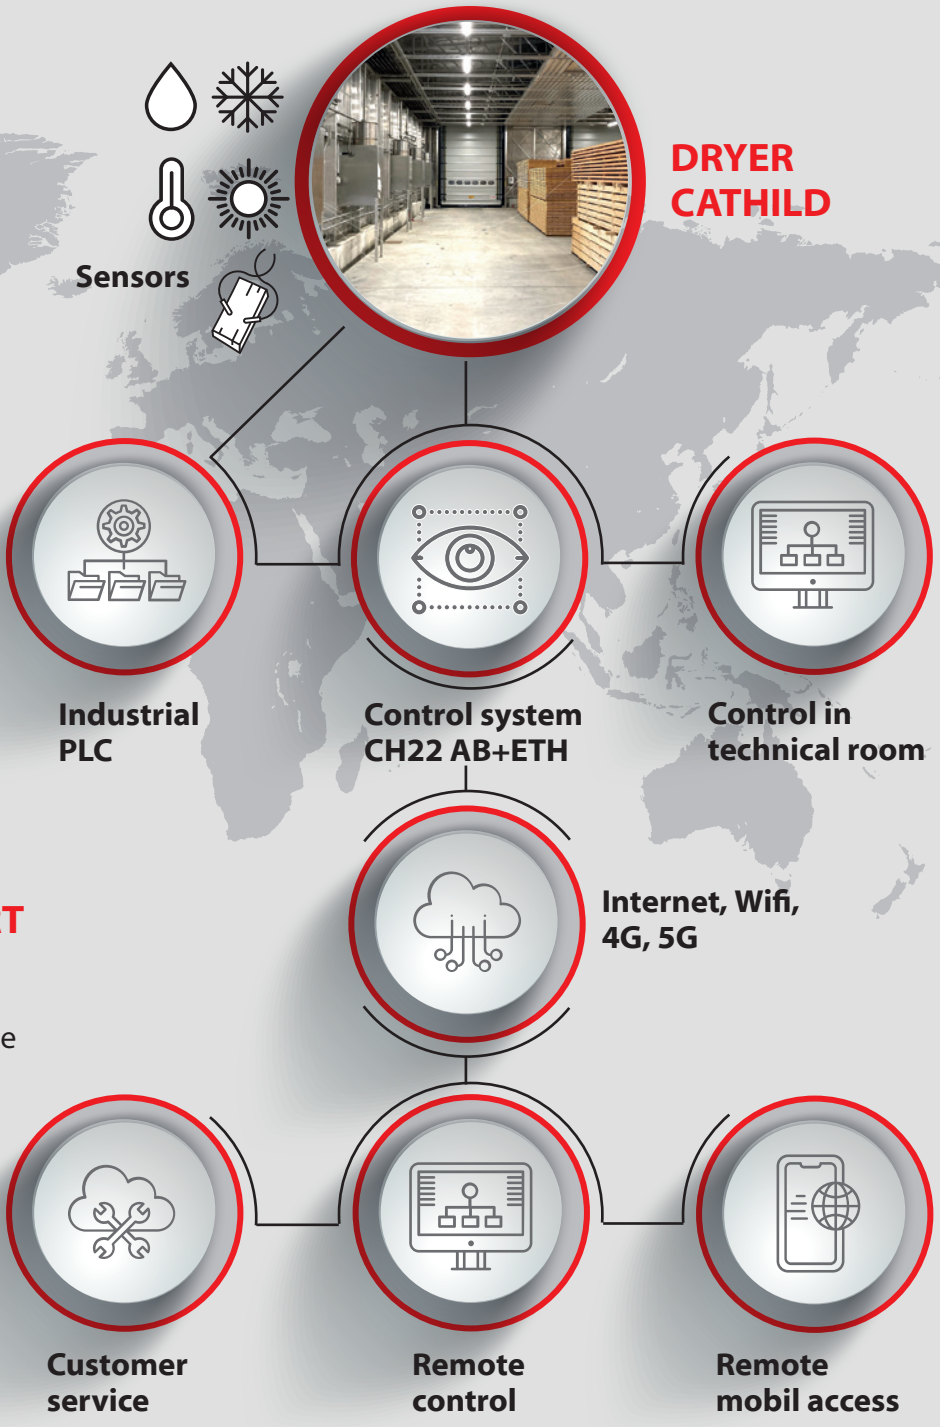
EASE OF USE
Enjoy an intuitive, connected interface accessible via PC and smartphone for simple, effective remote monitoring. Real-time cycle tracking and curve display provide instant and comprehensive control.

HIGH DRYING QUALITY
Flexible control options perfectly adapt to your needs, while precise regulation ensures optimal drying every time.

ADAPTABILITY & SAFETY
Compatible with all dryer types — fixed, mobile, pre-dryers (PK), GCBT, or steam chambers — and all energy solutions. The system fully supports ISPM 15 compliance with dedicated data archiving.

INSTANT TECHNICAL SUPPORT
Advanced alarm management, real-time fault indication, and virtual assistance simplify maintenance and reduce reliance on external service providers.

SYSTEM EVOLUTION
Digital traceability of cycles, data printing, software updates, and remote support by CATHILD ensure rigorous monitoring and continuous assistance according to the subscribed service level.



CATHILD control system :

Advanced features, intelligent automation, enhanced connectivity, safety and compliance.

CATHILD ensures ongoing support and remote system monitoring for complete peace of mind.

Regular software updates include performance improvements, new features, and security patches.
