Boosted output

2X less handling  
Background loading

24/7/365  
50% more output per year

Continuous  
operation

## MULTIZONE MOBILE DRYER

CATHILD INDUSTRIE

## MULTIZONE MOBILE DRYER

### REDUCED HANDLING COSTS Fully automated multizone system

Prepare loads during hidden time across multiple zones while the dryer operates continuously **24/7/365**, increasing annual production by 50%.

### AUTOMATED MOVEMENT Automated movement remotely supervised

Automated door opening, fluid disconnection/reconnection, lifting, and movement — all without manual intervention. Support multiple dryers on a single line, with several lines running in parallel.

### PROCESS OPTIMIZATION Wood loading automation

The **CATHILD mobile dryer** eliminates handling between sawmill and storage. Enjoy increased stability and airtightness thanks to a mechanized lifting system. Reduce your handling costs by 50% and benefit from neat stacking for superior drying quality.

#### CATHILD mobile dryer

A continuous dryer without trolleys, delivering batch-drying quality

Fully automated dryer movement with only 30 minutes of downtime between cycles

50% increase in annual dried wood production
